SAFETY Bath

invites you to

Take Down the Barriers

Since 1992, Safety Bath Inc. has been changing the way people bathe by offering accessible bathtub options.

The Safety Bath So-Lo and the So-Lo with Heated Shower Deck:

- Offer an aesthetically pleasing but practical bathtub that allows for aging in place
- Eliminate the need to step over a bathtub wall
- Are designed to meet the needs of the baby boomer generation as they age
- Accommodate construction industry demands for universal design in the marketplace

Safety Bath So-Lo models have obvious advantages over existing bathtub/shower arrangements commonly found in senior housing:

- One unit now provides both a bathtub and shower, thus saving bathroom space
- The housing unit can be utilized through changes in mobility brought about by aging

- Increased property resale value due to universal design
- Provides a safe bathing/shower option

The So-Lo

Measures 32"W x 18"H x 59.5"L

- Can be installed in a regular bathtub sized area.
- **Safety Seat** is included as a separate attachment and comes with retaining wall bracket.

So-Lo with Heated Shower Deck

Measures 44"W x 18"H x 59.5"L

- Suggested for use in new construction or areas that will accommodate a larger bathtub width
- Heated shower deck offers a warmed seating area for those who wish to sit while bathing or showering

Both So-Lo and So-Lo with Shower Deck feature:

- **Low entry step**
- **Easy access door**
- **Optional 12 jet warm air massage**
